

## **AWF 2020 DISCUSSION FORUM - INNOVATION & WELFARE**

Join AWF for a day of CPD dedicated to animal welfare on Monday 8th June, 2020 at [One Great George Street](#), London. The Discussion Forum is an annual event that brings together expert speakers, veterinary and animal welfare professionals, students and parliamentarians to confront current welfare issues and inspire change. It offers a range of networking opportunities that continue into the evening at the joint AWF/BVA reception at the House of Commons.

The 2020 theme, *'Technology and welfare: a happy partnership?'*, will look at how technological advances are influencing our ability to improve animal welfare in a variety of different areas.

### **Sessions include two big debates:**

- Innovation and overtreatment – does the desire to innovate compromise companion animal welfare?
- Farming, sustainability and welfare – what are the interactions between farming methods, production systems, sustainability and welfare?

### **And Q&A sessions:**

- How might changing the interpretation of 'under our care' impact animal welfare?
- What are we doing to improve welfare: updates on AWF funded research.

Tickets can be purchased on
